1. Change history

Version	Date	Changes
4.0 errata 1	2016-03-17	Final version for release

2. Introduction

2.1. Overview

This document specifies errata to the Smart TV Alliance version 4.0 specification. It is intended to be read in conjunction with that document.

2.2. References

[A] RFC4346 The Transport Layer Security (TLS) Protocol Version 1.1
<https://tools.ietf.org/html/rfc4346>

2.3. Trademarks and copyrights

All trademarks and copyrights are the property of their respective owners.

3. Errata

3.1. Status Definition

This document specifies technical features of the platform, using the terms defined in the table below. Items not listed are not supported by this version of the specification. Individual products may support extra features, but applications shall not use such features when targeting the Alliance platform.

Status	Definition	Remarks
M	Mandatory, Fully Supported. All devices SHALL support this feature in order to comply with this specification.	Such explicitly defined feature overrides any such feature included from older included specifications.
C-M	Conditionally Mandatory. Implementation of this feature is optional, but devices that do implement this feature SHALL comply with this specification.	
P	Partially Supported.	
O	Optional. Details are defined and devices MAY support this feature.	
Removed	Removed from specification. Included in v3.0 specification but removed by this errata.	Items are shown with strikethrough .

3.2. Changes to v4.0 specification

The following text and tables replace the corresponding parts of the version 4.0 specification. All other features are unchanged.

Section 3.3.1 HTML5 profile

Standard	Reference	Status	Remark
SSL / TLS		Removed	HbbTV server certificates shall be supported.
TLS	[A]	M	HbbTV server certificates shall be supported. Replaces the requirement above.

The remainder of the section is unchanged.
